

ELECTRODE TYPE SH25

ELECTRODE SH25

The electrode SH25 is used mainly on super heated boilers, steam boilers, feed water tanks and expansions systems.

The electrode may be installed vertically or horizontally with one electrode used for each alarm level.

TECHNICAL DATA ELECTRODE SH25

External fitting:	SW 41mm WST 1.0718
Electrode bar	AISI 303 8mm
Insulator:	Teflon PTFE
Temp. range:	Max. +260°C
Pressure range:	PN40

SPARE PARTS

	SP No.
Electrode SH25 complete	004005 + length
Electrode bar	004003 + length
Cu-gasket	004017
